

DPD 0070-61
21 February 1961

RECORDED FOR: Chief, Operations Branch
Acting Chief, Air Section
Chief, Control Center
Chief, Intelligence Section
Chief, Plans Section
Chief, Requirements Section

POLICY: Precedence Cable Traffic

REFERENCE: Memo from Chief, Operations, dated 15 December 1960, Subject "Precedence Cable Traffic"

Attached is a time of transmission study based on traffic received in the "I" Building signal center during the month of January 1961 from DIA stations of particular interest to DPD. Figures based on outgoing traffic were not available. However, they should closely approximate the figures shown for incoming traffic. The average times for some stations might be somewhat misleading with regard to a particular precedence since the number of messages received and considered in the averages were very few during the period of the report. Where a dash mark appears it indicates that no messages of that precedence from that particular station were received during the reporting period.
